EVEN. BETTER.

Non-hydroquinone brightening treatment exfoliates and moisturizes to minimize the appearance of dark spots and improve uneven skin tone

- Corrects visible discoloration
- Improves skin health and hydration
- Helps prevent future damage

Natural skin brighteners and botanical skin tone enhancing ingredients combine in this non-drug formulation to improve visible discoloration and brighten and even skin tone.

This correcting cream is developed to work as a lotion or as a treatment mask, with soothing moisturization to optimize results of hydroquinone and retinol therapies. For all skin types.

KEY INGREDIENTS

HEXYLRESORCINOL

Helps correct the appearance of hyperpigmentation and brighten skin in combination with topical exfoliants

ARBUTIN

Natural skin brightener proven to condition skin and promote an even skin tone

HEXANOYL DIPEPTIDE-3

Accelerates exfoliation helping to shed damaged and pigmented skin, to reveal a fresher, brighter complexion

BOTANICAL EXTRACT BLEND

Natural extracts rich in antioxidants help to tone and brighten while soothing and calming skin

GLYCERIN

Deeply moisturizes helping to replenish and maintain the skin barrier

DIRECTIONS FOR USE

Use as a treatment cream in the morning and a mask at night.

AM: Apply a thin layer to clean face before moisturizer and sunscreen.

PM: Apply a generous layer to clean face, leave on for 30 mins and tissue off any excess.

or

PM: Apply your retinoid or hydroquinone treatments as you normally would at night.

Apply a generous layer immediately after. For best results, leave on for 30-45 mins and tissue off any excess.
